

*Our Vision - Science is when we observe the world around us, are curious, ask questions and find answers to help to create scientists for the future.*

*Our teachers will teach us new things in a carefully planned way to create high quality discussions about what we already know and what we have learnt.*

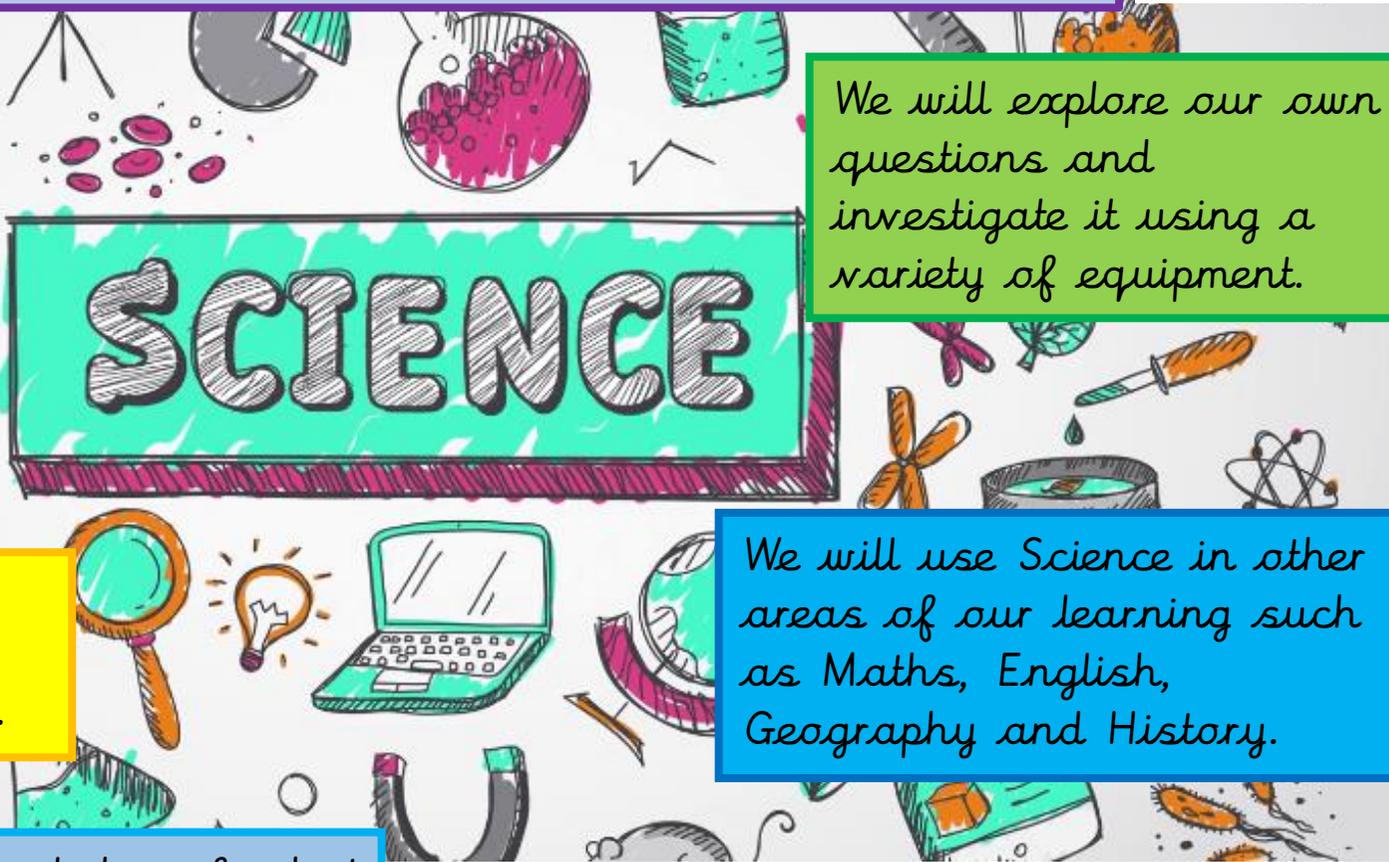

*We will explore our own questions and investigate it using a variety of equipment.*

*We will ask questions and will try to answer them using scientific vocabulary.*

*We will use Science in other areas of our learning such as Maths, English, Geography and History.*

*We will apply our knowledge of what we have learnt to real-life situations outside the classroom.*

*We will learn outside whenever possible.*

SCIENCE
